

Creation Stories Project

After completing your graphic organizer, it's time to write. With your group, you are going to come up with your own, brand new, totally unique creation story about how the universe, the Earth, humans, animals, and everything else came into being. This is a creative writing assignment, so... be creative and have fun with it. The sky's the limit, so make your story as unique, silly, or weird as you want it to be (just keep it PG for school). Your story should be $\frac{3}{4}$ - 2 pages in length and be written as a story (with a beginning, middle, and end). Take points from the creation stories we read in class and use them as inspiration for your own.

When your story is complete, it's time to move it to a Power Point presentation and add pictures so that you can present your stories to the class.

The students will be grading each other, so do well.

Extra Credit Opportunity: Create a "cave painting" type graphic depicting your creation story for up to 20 bonus points!
